Issued: September 2026

Sourcing Overview

ZEE Co. operates an active global sourcing network built over 19+ years of trade. Our supplier relationships span manufacturing hubs across Asia, Europe, and the Americas, with particular depth in China, Turkey, Germany, Italy, India, and South Korea.

We source across a broad range of product categories — from industrial equipment and construction materials to consumer goods and food commodities — applying consistent verification and quality assurance protocols regardless of category or origin market.

Primary Sourcing Markets

China	Electronics, machinery, textiles, consumer goods, industrial components, packaging materials, chemicals
Turkey	Textiles, apparel, furniture, construction materials, food products, automotive parts
Germany & Italy	Industrial machinery, precision equipment, food processing equipment, automotive components
India	Pharmaceuticals, textiles, chemicals, agricultural commodities, engineering goods
South Korea	Electronics, automotive components, steel products, chemicals, cosmetics
UAE & GCC	Re-export commodities, petrochemicals, aluminium products, food items

Product Categories

Our sourcing capability spans the following product categories. This list is indicative — we regularly source outside these categories based on client requirements.

- Industrial Machinery & Equipment
- Construction Materials & Building Products
- Electrical & Electronic Components
- Textiles, Apparel & Fabrics
- Food Commodities & Agricultural Products
- Chemicals & Raw Materials
- Automotive Parts & Accessories
- Consumer Goods & FMCG
- Medical & Healthcare Equipment
- Packaging Materials
- Furniture & Interior Products
- Steel, Aluminium & Metal Products

Supplier Verification Process

All suppliers in our network undergo a structured verification process before we recommend them to clients or place orders on their behalf:

- Business licence and registration verification
- Factory audit (on-site or third-party) for new suppliers
- Sample evaluation and product specification review
- Export history and reference checks
- Financial standing assessment for large-volume orders
- Ongoing performance monitoring across active engagements

Procurement Management

Once a supplier is selected and terms agreed, ZEE Co. manages the full procurement cycle:

- Purchase order preparation and issuance
- Payment coordination and escrow management where applicable
- Production monitoring and milestone tracking
- Pre-shipment inspection (PSI) coordination
- Quality control and defect resolution
- Export documentation preparation

Freight & Logistics

ZEE Co. coordinates freight across all major modes, working with established freight forwarders and carriers to secure competitive rates and reliable transit times.

Sea Freight

FCL and LCL shipments from all major origin ports. Primary routes: China (Shanghai, Ningbo, Guangzhou), Turkey (Istanbul, Mersin), Europe (Hamburg, Genoa, Rotterdam) to Alexandria and Port Said.

Air Freight

Time-sensitive cargo via Cairo International Airport. Suitable for high-value, low-volume, or urgent shipments.

Multimodal

Combined road/rail/sea solutions for landlocked origin points or complex routing requirements.

Customs Clearance Coordination

ZEE Co. coordinates customs clearance at Egyptian ports of entry, ensuring full compliance with Egyptian Customs Authority requirements including:

- ACI (Advance Cargo Information) system compliance
- CargoX digital documentation submission
- Import permit and licence coordination
- Duty and tax calculation support
- Customs examination facilitation

Quality Assurance

Quality is embedded at every stage of the ZEE Co. sourcing process. We apply a multi-layered approach to ensure that goods meet agreed specifications before they leave the origin country:

- Specification documentation and sign-off before order placement
- Pre-production sample approval
- In-line quality checks during production (for large orders)
- Pre-shipment inspection (PSI) — visual, dimensional, and functional
- Third-party inspection coordination (SGS, Bureau Veritas, Intertek) where required
- Non-conformance management and supplier remediation

Reporting & Transparency

Clients receive regular status updates throughout the sourcing and procurement process, including supplier shortlists, audit reports, production milestones, shipping confirmations, and customs clearance updates. All documentation is provided in both English and Arabic where required.
